---

## Objective

A motivated developer with in-depth knowledge of languages and efficiency in programming, seeking a position in a growth orientated company where I can utilize my skills to the advantage of the company, while simultaneously developing my skills.

## Education

### Bachelor of Science, Computer Science

Expected Grad 05/2022

California State University Los Angeles

## WORK EXPERIENCE

### Association for Computing Machinery

09/2012 - Present

Role – Webmaster

- Working knowledge of HTML, CSS, Node.js, and Bootstrap into the React based website.
- Oversee each team member's work implementing GitHub to ensure all code is deployable.
- Training multiple members to collaborate, improving their skill set so they can replace me once I graduate.
- Deployed the ACM club website with Google firebase, learning how to connect ReactJS code to a Firebase database.

### East Los Angeles Community College

02/2018 – 07/2019

Role – Program Assistant

- ELAC representative that would travel off-site as needed.
- Assisted anyone with enrollment or registration needs.
- Helped any instructors or supervisors for any specific ELAC events that were being held.

## Project Experience

### Personal Website – HTML, CSS, JavaScript, Visual Studio Code

02/2019 - Present

Role – Club Member

- Attended every workshop to complete a personal website.
- Implemented CSS, Bootstrap, and JavaScript to enhance my website.
- Using NameCheap to buy a website domain, connecting it to my GitHub to preview my portfolio.

### Clients Portfolio – HTML, CSS, Bootstrap, Visual Studio Code, Github

01/2020 - 02/2019

- Launched clients website using NameCheap. Ensured it was the best hosting plan.
- Communicated with owner to understand demands and layout.
- Website was completed within 4 weeks due to the client's speedy deadline.

## Leadership Experience

### Association for Computing Machinery

09/2012 - Present

Role – Webmaster

- Constantly collaborating between board and committee for decisions within the club's constitution.
- I delegate and assign work to each web committee member and track it using Jira for an efficient flow of work.
- Monitor, train, and mentor all web committee members to ensure the ACM website can be in demand with the current trends.

### ACM Club's 'About Us' Web Page

03/2020 – 4/2020

Role – Web Officer for Association for Computer Machinery at Cal State LA

- Utilized Figma to professionally design the web page.
- Learned React and Bootstrap in a timely manner to meet deadlines.
- Collaborated often with my team to discuss important matters on the look of the website.
